The Background

A school in Staffordshire were pointed in Money Sphere's direction via an ex head teacher to see if we could help with some affordability issues in relation to replacing their entire Wi-Fi infrastructure. The school were limping along with inadequate Wi-Fi just due to the fact it was a significant investment to pay for the entire upgrade through cash, cash they wanted to keep in the school for emergencies. The teachers and students were really beginning to suffer due to the fact a lesson couldn't run smoothly, any online/computer related activities became almost impossible.

The Solution?

We got in touch with the school and took time to listen to their pains and asked them what their ideal solution would be, their response was simple 'how do we make it more affordable' – this is exactly what we did, we structured a compliant operating lease spread over 5 years with all continuation rentals given from the outset. Not only did we give them all the costs up front but we also spent time with their finance department explaining the terms and conditions of the lease. This school was unfamiliar with leasing and were naturally a little nervous but having seen everything on paper in black and white they proceeded with our proposal.

The Result?

- The teachers are now able to plan their lessons more effectively without the worry of inadequate Wi-Fi
- The students were much happier and engaged because they weren't constantly losing connection during lessons
- The school were able to preserve their much needed budget and allocate it to other areas of the school
- The school now has an infrastructure which can support other technology investments, bringing them up to date
- The school now feel safe knowing they have a reputable, reliable and transparent leasing company they can work with
